Education

Master of Computer Science, California State University, Dominguez Hills — Expected *Dec 2024*
- *SE Track,* Cyber Security Fundamentals Certificate — CGPA: 3.8
- **Coursework:** Thesis, Adv Programming Languages, Software Project, OO Design, Data Structures and Algorithms, AI, HCI, Networking
- **Leadership** AR/VR Club (President), IBM Z Systems (Student Ambassador), MSU (Treasurer)

Bachelor of Chemical Engineering, Texas A&M University — Jan 2017 – Jul 2020
- Undergraduate Research Scholar
- **Leadership** SPE (Outreach Coordinator), Resident Housing (Secretary), College Soccer and Basketball Player

Work Experience

AR/VR Student Researcher — *Sep 2023–Present*
CSUDH Thesis Research — *Carson, CA*

- Developed an AR/VR application campus map software that allows students and faculty to view live sensor data inside campus buildings (temperature, humidity, people occupancy) built through Oculus Quest.
- Architecture the entire AR/VR framework application. This includes Front-End design of the 3D Campus Model using Unity3D and TCP/IP integrating telemetry sensor data to Azure SQL database to stream the XR application.

Information Technology Student Assistant — *Mar 2022–Present*
Learning Spaces – Information Technology — *Carson, CA*

- Boosting classroom system uptime by 50% setting up and configuring new hardware (PC, projector, monitor), reimaging Microsoft Windows, and maintaining inventory records of classroom IT equipment thus reducing class disruptions due to IT issues
- Improving call resolution rates by 75% by assisting faculty and students in troubleshooting login issues, duo authentication process, classroom panel and projector issues.

Utilities Field Engineer — *Sep 2020–Sep 2021*
Qatar Petrochemical Company — *Messaied, Qatar*

- Optimized Distributed control systems using PLC panels, reducing equipment downtime by 50% and enhancing operation efficiency.
- Prepared technical documentation which outlined various industrial systems operation, thus reduced field operation errors

Mixed Reality Student Researcher — *Sep 2018–Dec 2021*
AMIRA Research – TAMUQ — *Doha, Qatar*

- Developed a mixed reality prototype using Unity Engine, which provides immersive user training in building the operations of a desalination plant and safety scenario scenes, programmed with C# and Visual Scripting, leading to a 50% increase in user engagement and understanding of desalination processes.
- Tested the usability of the MR application with 15 STEM students using the deployed application on Microsoft HoloLens 1st Gen, capturing user's learning feedback on the MR application's interactivity and visualization, resulting in a 20% improvement in usability scores. The results were published in two research journals.

Publications

- *Ghazali, S.;Abdalla, H; Kamil, M.Z.;Kakosimos, K.;Hodges,A. Development of an Educational Mixed Reality Game on Water Desalination Plants*
- *Ghazali, Sofian; Hussein, Aisha; Kamil, Zaid (2020). Implementing VR/AR Systems for Insight Into Water Desalination Plant*

Software Projects (Portfolio: mzaidk.net) GitHub: https://github.com/ZaidKamil1574)

VR Offshore Oil Rig: Designed a VR offshore oil rig facility which provided visualization of reservoir simulation Petroleum Recovery Processes.
Campus Dining Application: Designed a system to streamline ordering to cater student's dietary needs | *Utilized: HTML, CSS, UI/UX*
Computer Vision: Utilized C++ and python via for Face Detection, Object Detection, and facial recognition in trained images
Weather Application : Developed an interactive weather application to iOS platform using Storyboard and SwiftUI programming.
AR Earth and Food Menu App: Developed an Earth AR a simple AR food menu app using 3D UI components application to Apple iOS
IoT Sensor Network: Use of three algorithms to determine the best path of Robot from start to target node. Utilized: Python, MARL
Portfolio Website: Built a website which showcase my experience, projects and skills (website: mzaidk.net) | Utilized: Canva, CSS, HTML
Deep Learning: Utilized TensorFlow and Matlab for Classification of Images, feature extraction, and incorporating new data sets
Virtualization: Created a virtual representation of a webserver using Linux OS in VMware and accessed it from the host machine.

Skills

Programming: C#, C++, Python, Java, SQL, SwiftUI**; Tools:** Unity, MS Office, Wireshark, Aspen, Canva, Visual Studio, XCode, Azure, PowerShell**;**
Dev Exp: AR/VR, IoT Sensor, UX/UI, Game Design, App Development, Prototype, Front-End, Computer Vision, Spatial Computing, PLC, Hardware, Software Dev, IT Operations, Computer Graphics, Programming**; System:** Oculus SDK, HoloLens, Linux, Windows, visionOS, OpenCV, IT Operations, User and Design Testing, 3D Modeling, AR/VR/XR; **Soft Skills:** Communication, Safety, Presentation, Troubleshooting, Leadership

Certifications & Licenses

LinkedIn: Career Essentials in Generative AI, iOS 15 Development Training, AR Development Techniques ; **IBM:** IBM Z Xplore – Concepts.
CSUDH: Cyber Security Fundamentals Certificate. AWS Cloud Practitioner (In progress); Society Petroleum Engineers (Credential ID: 4790593)
