Education

Master of Computer Science, California State University, Dominguez Hills — Expected *Dec 2024*
- *SE Track,* Cyber Security Fundamentals Certificate — CGPA: 3.8
- **Coursework:** Thesis, Adv Programming Languages, Software Project, OO Design, Data Structures and Algorithms, AI, HCI, Networking
- **Leadership** AR/VR Club (President), IBM Z Systems (Student Ambassador), MSU (Treasurer)

Bachelor of Chemical Engineering, Texas A&M University — Jan 2017 – Jul 2020
- Undergraduate Research Scholar; **Leadership** SPE, Resident Housing (Secretary), College Soccer and Basketball Player

Work Experience

AR/VR Student Researcher — **CSUDH Thesis Research** (*www.zmap.com*) — *Sep 2023–Present*
- Developed an MVP of a real-time AR/VR campus map application that show IoT sensor data (temperature, humidity and people occupancy) inside campus buildings which was deployed and tested in Quest HMD
- Added high-quality responsive 3D assets model using Unity3D, and utilized MySQL for sensor database integration and management
- Conducted HMD testing and debugging to ensure optimal performance and user experience

AI & ML Engineer Intern — **MindHome Inc** (*www.mindhome.co*) — *May 2024–Present*
- Implementing ROS2 RPU, utilizing Aloha for Deep Reinforcement Learning and Vision Language Model
- Contributed to the UX design team to launch teleportation features via SteamVR

VR Teaching Assistant — **STALP-MSEIP** (https://www.csudh.edu/physics/programs/mseip-stalp/) — *Jun 2024–Present*
- Peer instructor to teach 1st gen high school students to develop VR projects and tools by utilizing Unity, Blender and Meta Quest HMD
- Assisted in testing and debugging VR applications to ensure educational effectiveness and optimal usability

Information Technology Student Assistant — **CSUDH Learning Spaces** (https://www.csudh.edu/it/) — *Mar 2022–Present*
- Boosted classroom system uptime by 50% setting new hardware (PC, projector, monitor), reimaging PC, and diagnosing IT equipment
- Troubleshooted login issues, authentication process classroom panel and projector issues. Inputted data-related queries, issues, and requests by faculty into ticketing systems thus improving resolution rates by 75% by troubleshooting

Utilities Field Engineer — **Qatar Petrochemical** (*www.qapco.com*) — *Sep 2020–Sep 2021*
- Utilized PLC panels to diagnose startup and shutdown issues of equipment, minimizing downtime by 50%
- Collaborated with Engineers to develop training and PID diagrams, aiding new Field Operators in operating process equipment

Mixed Reality Student Researcher — **AMIRA Research – TAMUQ** — *Sep 2018- Dec 2021*
- Developed a working MR prototype that trains students to build a desalination plant and process safety procedures, programmed with C# and Visual Scripting (Playmaker), leading to a 50% increase in user engagement and understanding of desalination processes
- Tested the deployed application on Microsoft HoloLens with 15 STEM students, capturing user's learning feedback on the MR application's interactivity and visualization, resulting in a 20% improvement in usability scores and journal publication of the results

Publications

- *Ghazali, S.;Abdalla, H; Kamil, M.Z.;Kakosimos, K.;Hodges,A. Development of an Educational Mixed Reality Game on Water Desalination Plants*
- *Ghazali, Sofian; Hussein, Aisha; Kamil, Zaid (2020). Implementing VR/AR Systems for Insight Into Water Desalination Plant*

Independent Software Projects (Portfolio: mzaidk.net) GitHub: https://github.com/ZaidKamil1574)

VR Oil Rig Plant: Designed and animated a VR offshore oil rig to train students the extraction process, utilizing SimLab software and C#
Dining Web Application: Designed a system to streamline order to cater student's dietary needs, incorporated UI/UX design principles
Computer Vision: Utilized C++ and python via for Face Detection, Object Detection, and facial recognition in trained images
Weather Application : Developed an interactive weather application to iOS platform using Storyboard and SwiftUI programming.
AR Earth and Food Menu App: Developed an Earth AR a simple AR food menu app using 3D UI components application to Apple iOS
IoT Sensor Network: Developed and tested algorithms for optimal root path from start to target node using python and MARL algorithm
Portfolio Website: Built a website which showcase my experience, projects and skills utilizing Canva, CSS, and HTML
Deep Learning: Utilized TensorFlow and Matlab for Classification of Images, feature extraction, and incorporating new data sets

Skills

Technical Skills: <Programming> [C++**,** C#, Python, Java, MySQL Query, Swift, JavaScript**] <Tools> [**Unity, Windows, Linux, ROS, MS Office, AWS, Aspen, Canva, Visual Studio, XCode, Azure, Blender, Perl, JUnit, Git**] <Technical> [**VMWare**,** HMD Testing, Software testing, Debugging, Visual generation, Application software, Relational databases, User Interface, Generative AI**,** AR/VR, Module testing, App Development, ROS2, UX/UI, Git, CSS, Game Development, LLM, Chatbot, Prototype, Front-End, Immersive Media, Computer Vision, Bash**] <Soft Skills>** [Communication, Analytical, Problem-Solving, Presentation, Leadership, Troubleshooting, Ability to work independently and as a team]

Certifications

<LinkedIn> Career Essentials in Generative AI, iOS 15 Development Training, AR Development Techniques **<IBM>** IBM Z Xplore – Concepts **<CSUDH>** Cyber Security Fundamentals Certificate **<Progress>** AWS Cloud Practitioner, IBM Full Stack Developer Certificate
